

OUSSAMA AICHAOUI

Full Stack Software Engineer | Backend • AI-Assisted Development • Cloud & DevOps

Algiers, Algeria | +213 792333219 | ouss.aich2022@gmail.com

Portfolio: ouss2022aich.github.io/ouss-portfolio-v2 | GitHub: github.com/ouss2022aich

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of professional experience helping startups and businesses turn software ideas into scalable products. Experienced in designing software architectures, building SaaS applications from MVP to production, developing secure REST APIs, and owning cloud infrastructure, CI/CD, and deployments. Passionate about delivering business value through modern engineering practices and AI-assisted development with Codex and Claude.

PROFESSIONAL EXPERIENCE

Backend Engineer | Tech For Startups | May 2025 – Present

- Architected two SaaS backends from MVP to production, delivering authentication, payments, notifications, media management, and scalable REST APIs.
- Built backend services supporting 1,000+ candidates generating digital CVs through automated workflows.
- Reduced deployment time ~70% through Docker, GitHub Actions, and CI/CD automation while managing infrastructure and production reliability.
- Accelerated development using Codex and Claude for implementation, debugging, refactoring, documentation, and testing.

Full Stack Developer | PAYD | Sep 2024 – Jan 2025

- Developed Laravel and Filament modules that automated insurance renewal workflows, improving operational efficiency.
- Designed and implemented maintainable backend services and business logic for enterprise insurance applications.
- Collaborated with cross-functional teams to deliver secure, production-ready features and improve system reliability.

Full Stack Developer | ETPB Chemrine | May 2020 – Mar 2022

- Developed Laravel and React applications with scalable REST APIs for internal business operations.
- Integrated Google Maps and Twilio APIs to enable location-based services and automated SMS notifications.
- Improved application performance through database optimization, testing, and secure deployment practices.

Database & Software Engineer | Djezzy | Jun 2018 – Jan 2019

- Designed and optimized MySQL databases to support internal project management processes.
- Developed PHP-based internal web applications that streamlined reporting and task management for project teams.
- Collaborated with business stakeholders to gather requirements and translate operational needs into scalable technical solutions.

LATEST PROJECTS

Hirinii — AI Recruitment SaaS

- Built a recruitment SaaS serving **1,000+ users**, enabling automated digital CV generation and streamlined hiring workflows.
- Designed the backend architecture with **NestJS, PostgreSQL, Redis, Docker, CI/CD**, and integrated authentication, payments, and cloud storage.

Misdakia — Review & Reputation SaaS

- Built a Laravel-based reputation platform enabling businesses to collect, analyze, and showcase customer reviews through secure public widgets.
- Developed review scoring, analytics, scalable REST APIs, and automated Docker-based CI/CD deployments for reliable production releases.

SKILLS

PHP • TypeScript • JavaScript • Python • Laravel • NestJS • React • Next.js • PostgreSQL • MySQL • MongoDB • Redis • Docker • GitHub Actions • CI/CD • Linux

EDUCATION

Master's Degree, Information Systems — CACI & ITEEM • 2021

Senior Technician, Computer Science: Databases — CACI • 2019

LANGUAGES

Arabic — Native • English — Professional • French — Professional
